

Junior JAVA Developer

Company Profile:

About Bristlecone is a leading provider of AI-powered solutions that help businesses transform their supply chains, optimize operations, and deliver seamless customer experiences. With decades of experience and a global presence, we specialize in driving digital transformation for industries across the globe. Our team of experts works at the intersection of innovation and excellence, ensuring our clients achieve operational efficiency and sustained growth.

Key Responsibilities

- Design, develop, test, deploy, maintain, and improve software applications on GCP
- Enhance existing applications and contribute to new initiatives leveraging cloud-native technologies
- Implement best practices in serverless computing, microservices, and cloud architecture
- Collaborate with cross-functional teams to translate functional and technical requirements into detailed architecture and design
- Participate in code reviews and maintain high development and security standards
- Provide technical oversight and direction for Java and GCP implementations

What experience you need

- Bachelor's or Master's degree in Computer Science or equivalent experience
- 3+ years of IT experience with a strong focus on Java development
- Proficiency in modern Java development (JDK 17+) and cloud computing concept
- Experience with GCP or other cloud platforms (AWS, Azure)
- Familiarity with agile methodologies and test-driven development (TDD)
- Strong understanding of software development best practices, including continuous integration and automated testing
